

# Decentralised organisation

The VINCI Energies Group is made up of 1500 close-knit business units operating as a network.

## Independence, a fundamental principle

VINCI Energies believes that it is important for each business unit to maintain its identity and autonomy so as to adopt entrepreneurship and responsiveness. Some choose to join one of its six network brands: : [Actemium](#), [Axians](#), [Citeos](#), [Graniou](#), [Omexom](#), [VINCI Facilities](#).

## Common values

The basic organisation and management principles are identical for all Group business units. Thus, despite the diversity of their activities, business lines and structures, VINCI Energies business units share a common culture and common values.
