Key energies at a glance

VINCI Energies serves public authorities and business customers, helping them to deploy, equip, operate and optimise their energy, transport and communication infrastructure, industrial facilities and buildings. Leader in France and a major actor in Europe, VINCI Energies is present worldwide. As a key provider of energy efficiency and renewable energy solutions, VINCI Energies' capacity to integrate complex systems is a key component of VINCI's overall offer.

VINCI Energies combines expertise in its own technology areas with expert knowledge of its customers' businesses. It leverages these capabilities to develop high value added solutions to address customers' demands for efficiency, reliability and safety in:

- electrical power, heating, ventilation and air conditioning (HVAC),
- mechanical engineering,
- and information and communication technologies.

These solutions support customers throughout their projects' lifecycle, from project engineering and execution to maintenance, operation and facilities management. Thanks to an exceptionally dense network of 1,600 business units in 51 countries, VINCI Energies combines global reach with local service.

VINCI Energies carries in its genes the human values of solidarity, trust, autonomy and responsibility. The Group adopts development and pooling of competencies by encouraging the hiring of young people, formation and exchanges between the employees of its business units.

As a key player in energy efficiency and renewable energy, VINCI Energies' capacity to integrate complex systems is a key component of VINCI's overall offer.
