

# Holtekamp 150kV Substation in Papua

Omexom Indonesia (VINCI Energies) recently completed on behalf of PLN the Holtekamp 150kV substation located in Papua.

The works for this project were undertaken on a full EPC basis – design, earthworks and civil works, procurement of electrical and mechanical equipment, construction and commissioning. The Substation was built in 13 months with a section thereof energized in less than 10 months.
