

Actemium

Actemium, VINCI Energies' brand dedicated to industrial processes, provides innovative solutions in Indonesia since 1984. Operating throughout the equipment life cycle, Actemium designs, implements and maintains its customers' production equipment with the goal of continuously improving their performance.

Actemium Oil & Gas Systems Indonesia

Actemium Oil & Gas Systems Indonesia (a Business Unit registered under the company name of PT Jetec Indonesia), is a System Integrator specialist in the fields of control and safety automation systems integration, telecommunications integration and electrical solutions...

Actemium Oil & Gas Systems Indonesia, with a high engineering capability team of over 100 staff is performing projects through Indonesia from its Jakarta base. The Business Unit provides customized multi technologies systems integration solutions, covering engineering, In-house software programming, in-house systems manufacturing in our workshop, integrated factory acceptance tests, construction, pre-commissioning, systems revamping and hot transfer without plant shutdown, commissioning. Our technical expertise is the following:

Multi brands automation systems (DCS, PLC, Safety PLC) software and hardware design, software programming, manufacturing. Control, safety and fire & gas systems revamping, reverse engineering and hot transfers without plant shutdown. Telecommunication & telemetry solutions sizing calculations and equipment integration (radio & FO back bones, radio trunking, LAN/WAN, IP telephony, CCTV, PAGA etc...). MV/LV power distribution modelisation, sizing calculations up to installation and commissioning site activities.

Actemium Oil & Gas Contracting Indonesia

Actemium Oil & Gas Contracting Indonesia delivers solutions in the field of instrumentation, automation and power distribution for onshore and offshore plants thanks to its second to none engineering and project management skills.

Our EPC solutions encompass PLC/DCS based control systems and Fire and Gas detection systems for hazardous areas as well as electrical transmission and distribution networks from low voltage to high voltage. In addition, we design and build various customized panels in our workshop such as: PLC panels, pneumatic wellhead control panels, hydraulic power units and marshaling cabinets.

Actemium Balikpapan Indonesia

Actemium Balikpapan Indonesia addresses our traditional markets in the Kalimantan region. The branch located in Balikpapan is fully staffed with its own engineering and project management resources that allow the delivery of EPC solutions in the areas of instrumentation, automation and power distribution. Our workshop facilities available in Balikpapan make possible the fabrication of various customized panels such as: PLC panels, pneumatic wellhead control panels, hydraulic power units and marshaling cabinets.

Actemium Industrial Systems Indonesia

Actemium Industrial Systems Indonesia (a Business Unit of pt Jetec Indonesia) is a Automation – MES and E&I turn key specialist for Industry sector. Actemium Industrial Systems Indonesia with a high engineering capability performs projects through Indonesia and South East Asia for customised control systems and electrical solutions, covering engineering, in-house software programming & manufacturing, E&I construction, pre-commissioning,

commissioning. Our technical expertise is the following:

Multi brands automation systems (PLC, SCADA, Data Management Systems MES, ERP interfaces) software and hardware design, software programming, panels manufacturing. Automated control , SCADA – MES systems revamping, reverse engineering and hot transfers without plant shutdown. Telemetry – scada systems MV/LV power distribution modelisation, sizing calculations, procurement, installation and commissioning.

Actemium Maintenance Indonesia

Actemium Maintenance Indonesia carries out long term maintenance contracts for the Oil & Gas industry. The type of works undertaken are preventive maintenance, corrective maintenance, repairs, upgrading works, purchasing and vendors call out in several fields of expertise such as: electrical, instrumentation and control, fire and gas, HVAC, control valves. The business unit has several references with Pertamina Offshore West Java (PHE ONWJ), BP and Conoco Philips.
